Description

[erva](#)

80" Heavy duty 5-piece sectional pole set (70" out of ground height). 1" Diameter. Comes with 3- pole section, flange top to mount a wooden feeder or house, and a pound in ground socket.

This is the heaviest duty American made commercially available tubular bird feeder pole. This pole has an .060 wall thickness (16 Gage), and will not rust through. Our pole has almost twice the wall thickness found on mass market poles. It's also powder-coated with an automotive quality polyurethane and lead free black baked on finish.
